SUMMARY

MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React, and Node.js. Strong focus on backend development, RESTful API design, and scalable system architecture, with a problem-solving mindset applied to translating real-world requirements into efficient, maintainable solutions. Driven by continuous learning and technical growth in modern web development.

EDUCATION

St. Joseph's College of Engineering

Bachelor of Engineering (B.E) - Electronics and Communication Engineering
CGPA – 8.31

Nov 2022 - Present

Chennai, Tamil Nadu

SKILLS

Front-end: HTML, CSS, JavaScript, Bootstrap, React.js

Back-end: Node.js, Express.js

Database: MongoDB, SQL

Programming Languages: C++, Java, Python

Tools & Platforms: Git, GitHub, Render, Vercel

EXPERIENCE

TRIOS Technologies Private Limited

Embedded System Engineer Intern

Jun 2025 - Jul 2025

Chennai, Tamil Nadu

- Studied the basics of microcontrollers, embedded C coding, and interface design.
- Worked with sensors, actuators, and communication protocols (UART, I2C, SPI)
- Developed and tested basic embedded system prototypes through hands-on training

Entudio Technologies Private Limited

Embedded System Engineer Intern

Jun 2024 - Jul 2024

Tirunelveli, Tamil Nadu

- Learned fundamentals of Arduino, ESP32, sensors, and actuators
- Built basic IoT prototypes through hands-on training
- Gained practical skills in microcontroller programming and hardware integration

PROJECTS

Church Management Desktop Web Application | React.js, Node.js, Express.js, MongoDB

February 2026

- Implemented modules for managing members, equipment, finance, attendance, and other church operations.
- Solved the challenge of managing church operations manually by digitizing data into a centralized system
- Built the frontend using React.js, and backend services with Node.js and Express.js, and used MongoDB for data storage
- Improved administrative efficiency and reduced manual errors in church operations by creating a single digital platform

AskIt – Live Polling Web Application | MERN Stack, REST APIs, Authentication

September 2025

- Developed a live polling web application that enables multiple users to participate in and vote on available polls
- The poll data and user responses are stored in a cloud-based MongoDB Atlas database to manage the polling information.
- Visual insights are generated from poll responses using the React-ChartJS library to display the poll results
- This platform is designed to analyze public trends and understand audience opinions by collecting and visualizing user responses.

Live Movie Explorer Application | React.js, API Integration, State Management

May 2025

- Developed a movie explorer application using React and Node.js to enable browsing and searching movies.
- The Movie Database(TMDB) API has been used to fetch popular movies and handle search queries.
- Implemented separate backend APIs for popular movie retrieval and search functionality
- Enabled users to add movies to a favorites list through an interactive movie card interface.
- Managed application state using React Context API for centralized state management.

CERTIFICATES & COURSES

- Full Stack Web Development Program (CCBP 4.0)** – NxtWave Academy, June 2022 - Present
- JavaScript** - NxtWave CCBP 4.0 Academy, Feb 2025
- React Basics** – Meta (Coursera), Dec 2024
- Build your own dynamic web app** (HTML, CSS, JavaScript) - NxtWave CCBP 4.0 Academy, Oct 2024
- Introduction to Database** (SQL) - NxtWave CCBP 4.0 Academy, Oct 2024
- Python** – Sololearn, Sep 2022
