SUMMARY

MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React, and Node.js. Strong focus on backend development, RESTful API design, and scalable system architecture, with a problem-solving mindset applied to translating real-world requirements into efficient, maintainable solutions. Driven by continuous learning and technical growth in modern web development.

EDUCATION

St. Joseph's College of Engineering

Bachelor of Engineering (B.E) - Electronics and Communication Engineering
CGPA – 8.31

Nov 2022 – Apr 2026

Chennai, Tamil Nadu

SKILLS

Front-end: HTML, CSS, JavaScript, Bootstrap, React.js, TypeScript
Back-end: Node.js, Express.js
Database: MongoDB, SQL

Programming Languages: Java, Python
Tools & Platforms: Git, GitHub, Render, Vercel
Soft Skills: Communication, Problem Solving, Decision Making

EXPERIENCE

TRIOS Technologies Private Limited

Embedded System Engineer Intern, Chennai, Tamil Nadu

Jun 2025 - Jul 2025

- Completed training in microcontrollers and tested multiple embedded system prototypes through circuit assembly, coding, and debugging.
- Implemented and integrated sensors, actuators, and communication protocols across projects to build reliable systems and improve overall performance.

Entudio Technologies Private Limited

Embedded System Engineer Intern, Tirunelveli, Tamil Nadu

Jun 2024 - Jul 2024

- Applied technical skills in Arduino, ESP32, sensors, and actuators to design and develop hands-on IoT prototypes through end-to-end implementation.
- Built proficiency in microcontroller programming by developing custom firmware and integrating hardware components to create functional embedded systems.

PROJECTS

Church Management Desktop Web Application

February 2026

- Developed a full-stack church management application to replace manual record-keeping by digitizing member, finance, attendance, and equipment data, helping church administrators manage records efficiently and reduce human errors.

Tech Used: React.js, Node.js, Express.js, MongoDB, Authentication

Live Link: <https://lwag-frontend-6vos.vercel.app/>

AskIt – Live Polling Web Application

September 2025

- Built a MERN-based web polling application to solve the difficulty of collecting and analyzing audience opinions by enabling authenticated users to create polls, submit responses, and visualize results using React-ChartJS and MongoDB Atlas.

Tech Used: React.js, Node.js, Express.js, MongoDB, REST APIs, Authentication

Live Link: <https://askit-ashy.vercel.app/>

Live Movie Explorer Application

May 2025

- Built a movie explorer application to simplify movie discovery by enabling users to browse popular movies, search titles, and manage favorites through a React.js interface with Context API and TMDB API integration via custom Node.js backend services.

Tech Used: React.js, Node.js, Express.js, MongoDB, REST APIs, Authentication

CERTIFICATES & COURSES

- Full Stack Web Development Program (CCBP 4.0)** – NxtWave Academy, June 2022 - Present
- JavaScript** - NxtWave CCBP 4.0 Academy, Feb 2025
- React Basics** – Meta (Coursera), Dec 2024
- Build your own dynamic web app** (HTML, CSS, JavaScript) - NxtWave CCBP 4.0 Academy, Oct 2024
- Introduction to Database (SQL)** - NxtWave CCBP 4.0 Academy, Oct 2024
- Python** – Sololearn, Sep 2022
